- Antal programmer: 6

Mini Program

Brug dette program til let snavset service eller som forrens.

Intensiv 70 Program

Dette er et kraftigt program med høje temperaturer og øget vandtryk, ideelt til at rense bort en genstridig mastrester.

Auto Program

Ved hjælp af en række sensorer kan systemet selv vurdere, hvor meget du har fyldt i maskinen, og hvor beskidt det er. Ud fra resultatet af sensorernes beregning vælger maskinen selv det optimale program til din service. Denne proces minimerer forbruget af vand og strøm og kan også reducere støjniveauet ved at reducere spuletrykket, når servicen kun er let snavset.
